The attention of the teacher is directed to the fact that the program should take account of pupils who are not reciting as well as of those in recitations, and should indicate what each class is to do during each period of the day.

When all pupils who will probably enroll in the school have entered and been classified, and when your program has been finally adjusted to the needs of your school and approved by the county superintendent to be filed in his office as part of the records of your school. If there are a great many grades, classes should be grouped or combined in certain subjects. Authorities all agree that recitation periods should be at least fifteen minutes in the primary grades, twenty-five minutes in the intermediate grades, and thirty-five to forty-five minutes in the high school grades.

It is the duty of the county superintendent to see that this program is properly made and filled in as directed, and he should refuse to approve vouchers for monthly salaries of teachers until the program is made according to instructions. In his visit, to the school the county superintendent, by examining the register and his own note book in which he will carry his copy of the program, should see that the program is being followed by the teacher. It is his duty to require that all records be kept according to law and the instructions of the county superintendent and the State Superintendent of Public-Instruction.
