The teacher is instructed to make a copy of her program in duplicate on separate sheets. Fill in the program both as to periods of study and of recitations, denoting recitation periods with red ink and study periods with black ink. When prepared, submit one copy to the county superintendent for his consideration. The county superintendent is instructed to inspect carefully the program, note suggestions as to improvements, if there be any, and return to the teacher at once.

The attention of the teacher is directed to the fact that the program should take account of pupils who are not reciting as well as those in recitations, and should indicate what each class is to do during each period of the day.

If there are a great many grades, classes should be grouped or combined in certain subjects. Authorities all agree that recitation periods should be at least fifteen minutes in length in the primary grades, twenty-five minutes in the intermediate grades, and thirty-five to forty-five minutes in the high school years.

When all pupils who will probably enroll in the school have entered and been classified, and when your program has been finally adjusted to the needs of your school and approved by the county superintendent, it should be copied in the above space. A copy of it should be mailed to the county superintendent to be filed in his office as part of the records of your school.

It is the duty of the county superintendent to see that this program is properly made and filled in as directed, and he should refuse to approve vouchers for monthly salaries of teachers until the program is made according to instructions. In his visits to the school the county superintendent, by examining the register and his own notebook in which he will carry his copy of the program, should see the program is being followed by the teacher. It is the duty of the county superintendent to require that all records be kept according to law and the instructions of the county superintendent and the State Superintendent of Public Instruction.
